Dear Voloridge Team,

I am writing to apply for the Quantitative Research Internship at Voloridge Investment Management. As a student of Artificial Intelligence Engineering at Universidad Panamericana, I have developed strong foundations in mathematics, statistics, and programming, and I am eager to apply these skills to the research-driven and data-intensive environment that defines Voloridge.

What draws me most to Voloridge is your commitment to using statistical learning and scientific rigor to uncover predictive signals in financial markets. My academic and independent projects have involved areas such as time-series analysis, probabilistic modeling, and optimization—tools I know are crucial in the quantitative research process. I am particularly motivated by the challenge of working with noisy, high-dimensional data and designing models that generalize well in dynamic and uncertain conditions.

I am excited by the opportunity to contribute to a team where innovation, research integrity, and performance go hand in hand. I would be thrilled to learn from your researchers, collaborate on meaningful projects, and grow as a quantitative thinker in a high-impact environment.

Thank you for considering my application. I look forward to the opportunity to contribute to your research efforts and further develop my skills within the Voloridge team.

Sincerely,
Luis Quintanar Salinas.
